

MATERIAL SAFETY DATA SHEET

COMPANY DETAILS:

Western Stock Distributors

17 Rheola Street
West Perth WA 6005

Telephone: (08) 93212888

Facsimile : (08) 93224163

STATEMENT OF HAZARDOUS NATURE:

Not classified as hazardous according to criteria of NOHSC Australia.

I IDENTIFICATION

Product Name : WSD CY-GUARD SPRAY-ON SHEEP BLOWFLY PROTECTION

Other Names : None

UN No. : None allocated

Dangerous Goods Class : None allocated

Sub Risk Class : None allocated

Packaging Group : None allocated

Hazchem Code : None allocated

Poison Schedule : S5

Chemical Class : Insect growth regulator.

Formulation Type : Aqueous suspension of Cyromazine.

Uses : External treatment for blowfly control in sheep.

Physical appearance & Properties:

Appearance : A clear red liquid

Odour : Vinegar

Boiling point : Approximately 86°C

Vapour pressure (20°C) : Not available

Percentage volatile materials : Not available

Flashpoint (°C) : Does not burn

Specific gravity : 1.04 approximately

Solubility in water : Aqueous solution

pH (of solution) : 3 – 5

Viscosity : As water

Ingredients:

Component	Chemical abstract number	Percentage weight/volume
Cyromazine	66215-27-8	6 %
Acetic Acid		< 10%
Glycol		< 10%
Other ingredients determined not to be hazardous	Various	< 10%
Water		To volume

This is a commercial product, and the exact ratio of components may vary. Trace quantities of impurities are also likely.

Date Printed January 2009

WSD CY-GUARD SPRAY-ON SHEEP BLOWFLY PROTECTION

II HEALTH HAZARD DATA

Chronic:

No adverse health effects are expected, if the product is handled in accordance with this Safety Data Sheet and the product label. In laboratory animals cyromazine has shown no evidence of Mutagenic, carcinogenic, teratogenic or reproductive effects. Symptoms that may arise if the product is mishandled are:

Acute Effects:

Ingestion: Harmful if swallowed. LD50 (rat, oral) for cyromazine tech is 0.3387 mg/Kg.

Eye contact: Slight eye irritant.

Skin contact: Contact with skin may result in irritation. Non sensitiser.

Inhalation: This product is not expected to cause respiratory irritation.

Injected: This product would not normally present a injection hazard.

First Aid:

Ingestion: If swallowed or if symptoms of poisoning develop, contact a doctor or Poisons Information Centre (Phone: 13 1126). Thoroughly rinse mouth with water.

Eye contact: If this product comes into contact with eyes, hold eyes open and wash with running water for at least 15 minutes. In all cases of eye contamination it is sensible to seek medical advice.

Skin contact: Wash contaminated skin with plenty of soap and water. Remove contaminated clothing and wash before re-use. If irritation occurs seek medical advice.

Advice to doctor:

Treat symptomatically. No specific antidote is available.

III PRECAUTIONS FOR USE

Always Read and Follow the Label Instructions and Warnings

Risk Phrases: R22 – Harmful if swallowed.

Exposure Standards:

A Time Weighted Average (TWA) concentration for an 8 hour day/5 day week has not been established for this specific product by Worksafe Australia. There is a blanket recommendation of 10mg/m³ for inspirable dusts or mists when limits have not been established.

The nature of this product makes it unlikely that this level will be approached under normal use.

Engineering Controls:

In industrial situations, air concentrations below the TWA value should be maintained, otherwise use respiratory protection. Natural ventilation should be adequate under normal use conditions. If the air concentration of vapour or mist is high, the process should be modified to reduce the problem. Keep containers closed when not in use.

Personal protection:

Wear cotton overalls buttoned to the neck and wrist, safety boots, eye protection, a washable hat and impervious PVC gloves when using this product. Avoid skin and eye contact. After handling this product, always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing or other personal protective equipment before storing or re-using.

Respiratory Protection: If there is a risk of inhalation of spray mists, wear a mask or respirator meeting the requirements of AS/NZS 1715.

Protective Gloves: Impermeable protective gloves should be worn when using this product. For help in selecting suitable equipment, consult AS 2161.

Eye Protection: It is good industrial practice to always use protective eyewear. For help in selecting suitable equipment, consult AS 1336 and AS/NZS 1337.

Flammability:

The product does not burn.

IV SAFE HANDLING INFORMATION

Safety Phrases: S20 – When using, do not eat or drink.

Storage & Transport:

There are no special storage and transport requirements. Observe all relevant regulations regarding sale, transport and storage of this class of product. Store below 30°C (room temperature) in the closed, original container, in a dry, well-ventilated area, and protect from sunlight. Keep away from extreme heat and open flames.

Spills and disposals:

In the event of a major spill, prevent the spillage from entering drains or waterways. Wear overalls, eye protection and impervious gloves to prevent skin and eye contamination.

If safe to do so, stop the leak and contain the spill using sand or soil. Absorb onto inert material (sand, soil or other inert material). Collect and seal in properly labelled drums for disposal.

After a spill, wash the area, preventing the run-off entering the drain.

Wash all contaminated clothing and equipment before re-use.

Dispose of in compliance with Local, State and Federal Regulations.

Fire/Explosion Hazard:

There is no risk of an explosion from this material under normal circumstances.

Flammability: This product does not burn

Extinguishing Media: Use an extinguishing media suited to the materials that are burning.

Special Fire fighting Procedures: Fire decomposition products from this product may form toxic mixtures in confined spaces. Likely to decompose only after heating to dryness followed by further strong heating.

Stability: This product is unlikely to spontaneously decompose.

Polymerisation: This product is unlikely to spontaneously polymerise.

Decomposition Products: No decomposition products.

Materials to avoid: No particular incompatibilities.

V OTHER INFORMATION

Environmental Hazard:

Cyromazine technical is practically non-toxic to fish and bees. It is slightly toxic to birds.

Contact Points:

Police and Fire Brigade:

Dial 000

National Poisons Information Centre:

Dial 13 1126 (from anywhere in Australia)
